- **Domain & Delivery:** Client Lifecycle Management (CLM), Agile / Scrum Delivery, Process Improvement, Change Management, End-to-End Delivery Support.
- **Tools & Technologies:** JIRA, Confluence, SQL, REST APIs, Data Analysis, React.js, Python, PostgreSQL, Azure.

PROFESSIONAL EXPERIENCE

Nada Al Rabee Frozen Foods – Dubai, UAE

(05/2026 – 07/2026)

Technical Business Analyst (Contract)

- Gathered requirements directly from stakeholders to understand functional goals, defining the MVP scope and prioritizing product features based on feasibility and business value for a B2B/B2C web application.
- Managed the Agile product backlog, designed user workflows, and authored user stories with comprehensive acceptance criteria to support rapid software development.

Cloud Collab (Client: Mobileum)

(07/2025 – 04/2026)

Technical Business Analyst (Official Title: Software Development Engineer 2)

- Managed the requirements lifecycle from initiation to closure for global telecom platforms, ensuring alignment between business stakeholders and technology delivery teams.
- Obtained stakeholder buy-in and signoff on requirements, translating complex business needs into clear user stories and precise acceptance criteria in Jira.
- Conducted detailed impact assessments and facilitated sprint planning, contributing to process improvements that delivered an 80% increase in enterprise report generation speed.
- Ensured defect-free requirements through rigorous elicitation, acting as a critical communication bridge between business domains and engineering.

Appiness Interactive

(09/2024 – 07/2025)

IT Business Analyst (Official Title: Software Developer Web)

- Seido — B2B Data Intelligence: Employed comprehensive requirement elicitation techniques to develop business and solution requirements for a large-scale data intelligence platform, ensuring specifications were unambiguous and suitable for developers.
- Life's On — Manipal Hospitals: Led discussions with project teams to establish traceability to the business vision, authoring functional specifications for role-based workflows across 10+ hospital departments.

Freelance

(07/2023 – 08/2024)

Technical Consultant & Analyst (Contract)

- Facilitated stakeholder discussions to clearly identify results needed to achieve business goals, translating them into scalable solutions and defining the MVP scope.

- Proactively suggested system improvements and designed workflows to create sustainable business value, navigating ambiguity to drive successful outcomes from concept to implementation.

MathCo

(06/2022 – 06/2023)

Front End Developer

- Contributed to the end-to-end delivery of an Account Lifecycle Management (CLM) application, collaborating with diverse teams to translate complex business logic into practical UI building blocks.
- Implemented role-based access control and data visualizations to solve complex business problems and meet strict stakeholder needs.

Sirapatech

(03/2021 – 06/2022)

Front End Developer

- Redesigned an e-commerce platform, evaluating legacy systems to recommend and implement enhancements that reduced initial page load time by 50%.

EDUCATION

AMC Engineering College

(2016 – 2020)

Electrical and Electronics Engineering
